Jesus and some quantum physics things #1

Hi all,

I had a good friend who drew up a list of three questions for the Lord, asking me to ask the Lord those things the next time He appeared to me. I tried to explain that isn't how it happens, that He sets the agenda and no man can make Him appear nor can we on our own just see Him. (My friend is now in heaven and I'm sure he has asked the Lord directly, lol)

And when you are in the Spirit the questions you think you would ask Him don't even come to mind, but rather things of your spirit are what comes to mind, and sometimes you don't realize until later those things were stirring around inside you.

So in this 3 part series I'm going to share some things I've asked and been told that I can't necessarily point to a chapter and verse and say 'here it is', but rather principles observed in scripture. What the Father or Lord have shared with me fits, makes sense, and will I believe resonate as truth in your spirit. And as Paul said in Romans 12:3, I speak through the grace given to me - I can't speak from someone else's grace.

Let me share first what happened when I asked the Father "Are we all alone in the universe, or is there life on other planets?" This first part some of you may recall as I've shared elements of it before, but it leads to things I've never shared in this space, so read on please.

First, what I understood up to that point scientifically and Biblically

Scientists have determined there are over 250 specific requirements for a planet to be able to support life (that number seems to rise a little each year as scientists find more unique things required for life). For instance, if the earth was 3% closer or further from the sun we would burn up or freeze. If we had a binary star system instead of a single star life could not exist - and 75% of stars are double or binary so that eliminates 75% of all stars just by that.

If we didn't rotate at the pace of every 24 hours, one side of the planet would bake and the side would freeze. If we didn't have a moon to catch extinction level (if they hit the earth) asteroids and comets life could not exist. If we didn't have 2 large planets further out in the solar system to collect 'big ones' serving as a gravitational magnets for stray comets and asteroids headed our way, we could not have life...and on it goes with over 250 specific requirements.

To get down to numbers, the chances of 1 planet in all the universe having all those elements in place are 1 followed by 42 zeros: 1 chance in 1,000,000,000,000,000,000,000,000,000,000,000,000,000,000. That is a tiny, tiny, tiny chance...

But all the stars in the universe add up to only 1 followed by 27 zeros, which is a much smaller number than 1 followed by 42 zeros. That means there are far fewer stars in the whole universe than what are needed to be able to come up with just 1 planet that can sustain life. The universe is too small to make even 1 life sustaining planet.

Another way to say it - mathematically we should not exist. Planet earth is a miracle, an anomaly of nature, proving we are created - because He just doesn't have enough mass in the universe to actually have a planet earth. We are a purposed miracle and the math proves it.

That was rolling around my mind

At the same time I was wrestling with claims of those who believe the earth was created in a literal 6 days, versus those Christians who believe the earth is much older.

The book 'Starlight and Time' by Dr. Russell Humphreys explains that there are 2 identical atomic clocks, one near sea level in Greenwich, England, and its twin in Boulder, Colorado, about 1 mile (1.6km) above sea level.

He explains that Einstein theorized and has since been proven correct, that time speeds up the further from a gravitational force. In other words, time moves faster the further from gravity it gets. This is proven because the clock in Colorado runs 5 microseconds faster per year than the one at sea level, because it is 1 mile further removed from the gravity source of the earth than is the clock at sea level.

He explains how the Bible was written from earth's perspective, so that 6,000 years or so on earth could be 14 billion years out in space - being way far away from earth's gravity source - time being subject to gravity and perspective. Did the chicken cross the road or did the road move under its feet? Both perspectives are correct.

I had had enough

All this was swirling around in my mind and I really wanted to know if we are alone in the universe. Little did I know the Father would answer each question with a single sentence - and I was in awe.

Adding to all this: When I went to heaven I saw a lot of people, children and adults - people of all ages - each were sitting down in big chairs as they were watching all the activity, talking to people and such quite normally - but they were seated. Behind and above each one of them was what seemed to be a picture on a wall of a galaxy, but there was no wall behind them and those were actually galaxies, somehow seen enlarged, beautiful including earth's color spectrum like from the Hubble space telescope plus other colors not normally seen by human eyes - amazingly gorgeous, clearly displayed behind each person on purpose. (Nearly all were spiral galaxies)

Imagine a picture of a spiral galaxy about 4 to 5 feet (1.2-1.5m) around above each person. As we walked by I asked what that was all about, and the nonchalant reply was, "Oh, each one is the galaxy they'll be in charge of in the ages to come." I remembered scientists estimate there are about 100 billion stars in an average galaxy.

One of my favorite times with the Lord was when He told me the Father and He (in part) saved us for Ephesians 2:7: "That in the ages to come He (Father) might show forth the riches of His kindness which is toward us in Christ Jesus." The ages to come...wow...we can't even imagine.

All this and more was swirling around in my mind as I was contemplating; Are we alone in the universe? So I purposed to sit outside each and every night on our lounge chairs under the stars until I got an answer - it was open ended on my part. I started usually about 9pm (21:00) and just looked and thought and prayed and worshiped and talked to the Father for an hour or two each summer night - and I let Him know I would keep coming back until He answered my question: Are we alone in the universe? I had thought ahead to 'what if autumn or winter comes and He still hasn't answered?' and I planned to bundle up and keep at it - no thought of quitting.

It was right at the 2 week mark when one evening He spoke: "What you see when you look out at the stars is creation to day one. I created the universe then turned my creative attention to the earth, to complete it. There will come a time when I will again turn my creative attention to the rest of the universe to complete it. So what you are looking at when you look up at that stars, son, is the universe to day one."

That blew me away - I had to pull up Genesis 1:1 in my mind: "In the beginning God created the heavens and the earth. And the earth was without form and void.." I had never thought of it in chronological order quite like that, that first He created the universe (heavens) and then the earth came from that - which is how scientists say the earth came about - and there is no time limit placed on that creation. There is nothing in verse 1 to tell us how long creating the 'heavens' and the earth took. I was suddenly filled with joy and excitement and amazement that when I looked at the stars I was seeing the universe right after creation, TO day one.

Day 1 of creation didn't start until after "In the beginning God created the heavens and the earth." The universe and earth may be billions of years old while the creation of life on the planet could have taken days...

When you see the stars at night - that is the universe TO day one - and there will come a time He will turn His creative attention to the universe to complete it - that's what He told me - which tells me He has amazing plans for His children, and all our days here are preparation for the ages to come...

Next week, when I asked the Lord during a visitation; "How did you walk on water?"

Until then,

Blessings,

John Fenn

Jesus and some quantum physics things #2

Hi all,

This is part 2 of a 3 part series sharing some of the more quantum physics questions I've had for the Lord and the answers He has given.

How did you walk on water?

And so it was after teaching me in a visitation He casually asked, "Do you have anything you would like to ask Me?"

Now you might think with a handicapped son that I might ask why and about healing him - but He and I had already had that conversation which shall remain private - or about some other questionable event in my life, but that wasn't the case. When you are in the Spirit it seems the questions that come up are things in your spirit you've been curious about of things in Him but haven't been a top priority - so I asked, "How did you walk on water? Did you float or did the water firm up under your feet, or was there a path across the top that firmed up? And how and why did you transport all of you plus the boat across the lake like that?"

Setting the context - all these things were whirling around in my mind

Three gospels share the story of Jesus walking on water, which happened immediately after He had fed 5,000 men plus women and children: Matthew 14:22-33, Mark 6:45-52, John 6: 15-21.

John's gospel shares that upon seeing the miracle of the loaves the crowd had turned into a mob and were going to take Jesus by force and make Him King, so He sent the disciples away by boat with instructions to go to the other side, while He headed into the mountains - losing the crowds and having time to pray.

John also tells us they had rowed only 25 or 30 furlongs - a furlong is 660 feet or 201 meters. So 25 or 30 furlongs is 3.1 to 3.7 miles or 5.0 or 6.0 kilometers, which is only about half way across the lake. Verse 21 tells us "When He got into the boat, immediately the boat was at the land where it was going." He transported supernaturally the whole boat with them in it to their destination.

Mark's gospel, which is the gospel that deals with the unbelief of man's heart throughout, tells us Jesus 'would have walked by them' and focused on the disciples being in disbelief when Jesus walked on water; hearts hardened in unbelief 'because they considered not the miracle of the loaves'.

Matthew's gospel tells us they saw Jesus in the 4th watch, which was 3am to 6am, and is the only gospel that tells of Peter walking on water. Matthew shares when they saw Jesus walking on the water Jesus said to them, "Be happy. I AM. Now stop being afraid!" (v27) Peter's response in v28 was, "Lord, if you are (the I AM), command me to come to you on the water!" Peter was not questioning if it was the Lord or a ghost, he was challenging Jesus' claim to be I AM - the One who spoke to Moses out of the burning bush in Exodus 3:14.

Unfortunately most translations water down the I AM to 'it is I' which changes everything - the Amplified and a few others translate it exactly as Matthew wrote it.

So when I asked the Lord 'How did you walk on the water?'...

I was thinking of how it physically happened, why He wanted to walk on by them, and why He transported the boat full of men half way across the lake (Sea of Galilee). All that was wrapped up in that question. Additionally, I wanted to know if when Mark 6:48 says 'He saw them' though they were out on the lake in the middle of the night and He alone on land, did He see them in the Spirit or was it a clear moon or closer to 6am which was near sunrise and He could see them normally.

As quickly as I asked the question a vision popped up like on a large TV screen, with the Lord standing to the right of the rectangular window into that night, and He narrated and explained what I was seeing. My vantage point was initially shore-side from a distance, like a part of a triangle in which to my right I saw the boat and men on the lake rowing hard against the wind, and on the left side was Jesus in the hills. In that way I could easily see Him in the hills looking out and down onto the lake, while also seeing the boat and men working hard against the wind and waves. As He narrated my vantage point changed to follow Him across the lake as a by-stander.

Suddenly there appeared what seemed to be a tornado-like spinning cylinder on its side, with Jesus at the mouth of it and it extending all the way across the lake, past the boat, to the shore on the other side. Only then did I ask, "Lord, what am I seeing?" He replied, "You would think of it as a worm-hole, and it is the means by which I walked on the water and transported the boat to the other side." And with that, He started walking in it, narrating to me as He walked.

"I had said goodbye to the men and told them to meet me on the other side, and I expected them to do that, which is why I would have walked right on by them." Just then I saw the scene play out - Jesus was looking not at the men, but at the other side of the lake with a direct intensity in all the times I've seen Him, I've never seen before. He was focused on getting to the other side. I could see that tunnel, that swirling tunnel that was laying on the water and through which the Lord was walking, did not include the boat - Jesus was just walking through it towards the other side - I could clearly see the other end opened on the shore.

Then I saw the men cry out in fear, and the Lord's gaze was broken, and He looked towards them. As He did so the tunnel shifted so that even though He had now deviated from His original path, the tunnel deviated with Him, suddenly now encompassing the boat and Lord together. It was there He told them to be happy because He is 'I AM', now stop being afraid. And it was there Peter climbed over the side of the boat and began walking, only to start sinking - that was fascinating to watch as it was rather like quicksand suddenly to Peter. And the Lord bending over, taking him by the hand and back up to level, and walking together back to the boat. Then suddenly the boat and men were very nearly beached at the other side, just needing to nose the boat up a bit.

There is so much I learned just watching - seeing Peter sink as in quicksand, gradually as he looked at the wind and waves - spoke volumes about how faith is eroded, rarely just gone in an instant, but rather in a process of weighing in the emotions and thoughts the wind and waves with the fact you are walking where you never thought you would...so much in that little tiny part of what I saw.

He continued:

"When I told them to go to the other side, I did so because I had earlier calmed a storm with my command when we were together on the lake (Matthew 8:23-27) and they had similarly already used my name to heal the sick, cleanse lepers, and cast out demons, (Matthew 10:1-) so I expected them to do what they knew to do, but they didn't." Immediately I thought of John 6:1-6 which happened before He fed the 5,000, asking the disciples how they were going to feed the people and v6 says, "This He said to test him, for He Himself knew what He would do."

He doesn't test us with evil, but He will allow us to be in situations we have to choose faith or fear, to step out in what we know in our spirit, or shrink back. So much of walking with Him is 'according to your faith be it unto you'. He allows us to be in situations where we must choose, as it has been since the beginning.

He continued:

"I had what you would call a divine appointment to be on the other side at that time." That showed me something that would preach well in any message - no matter the wind and waves of life that put you behind in your walk with God, when Jesus gets into your boat you are immediately where you should have been all along - meaning the time and effort was not wasted, and you aren't behind as you suppose. You are exactly where you should be now at this time and place. Adjust your thinking accordingly by losing that old thinking that you are so far behind you've failed God. You may have, but not beyond His ability to keep the divine appointments of your life. He saw you battling the wind and waves and now that you are back with Him, you are where you should be!

I also became acutely aware of His expectations. Because they had used His name to heal and cast out demons, and because they had already seen Him calm a storm, He expected them to walk in those things. We so often seem to require reminder after reminder after encouragement after gentle nudges by the Spirit to step up and do what we know to do, His true expectations are that we see it, do it, and make it our lifestyle. I determined to put to use what I knew to do in the future.

Mark's gospel makes this statement in v51-52: "And they were amazed beyond measure, and wondered, for their hearts were hardened because they had not considered the miracle of the loaves." I told Him I thought they were a bit busy between the cleaning up of the leftovers and battling the wind and waves for them to have spent time considering the miracle of the loaves - but He had no apology nor explanation on my comment, letting what He had said immediately before stand.

And then He concluded after that notable silence: "But to answer your question; The water firmed up under my feet as I stepped."

Next week; "How did you walk through the crowds in Luke 4:29-30 and John 8:58-59?" Until then, blessings,

John Fenn

Jesus and some quantum physics things #3

Hi all,

I'm sharing a few things I've asked the Lord during visitations that fall under the category of 'quantum physics', continuing today with the question: "How did you walk through the crowds in Luke 4:29-30 and John 8:58-59?"

Setting the context of my understanding

Luke 4 records Jesus in His hometown reading in synagogue from Isaiah 61: 1-2, stopping mid-verse: "The Spirit of the Lord is upon me; because the Lord has anointed me to preach good news to the meek, to bind up the broken hearted, to proclaim liberty to the captives and the opening of the prison to those who are bound; to proclaim the acceptable year of the Lord..." and He stopped and sat down, saying 'This day is this scripture fulfilled in your ears.'

Let me insert here why He stopped mid-sentence. it is because the whole verse says: "To preach the acceptable year of the Lord, and the day of vengeance of our God."

Jesus stopped at 'the acceptable year of the Lord' and sat down. The Jews (to this day) didn't understand their would be two appearances by Messiah - one to pay for sin and one to bring His kingdom to earth as the conquering King. This verse includes both - the acceptable year of the Lord AND the day of vengeance of our God.

What the Father never told anyone is the mystery of the 2 appearing's, planned from the start yet to us a surprise; that God included the opportunity for Gentiles - non-Jews - to become part of the covenant. Ephesians 3:3-6; "How God made known to me the mystery, the mystery that had been hidden from ages and generations, but is now revealed to His holy apostles and prophets, that the Gentiles should be made fellow heirs..."

"Even the mystery which was kept secret from ages and generations, but is now revealed to His saints, to whom God would make known the riches of His glory in this mystery to the Gentiles, which is Christ in you, the hope of glory." Colossians 1:26-27

"But now to the power which can establish you in Christ Jesus, a mystery which was kept secret since the world began but is now being revealed to all nations for the obedience of faith..." Romans 16:25-26

This is why Old Testament prophecies seem to go point to point without mention of the church - God had not revealed to any Old Testament prophets that there would be about a 2,000 year season when He would give the Gentiles the opportunity to come into covenant with Him - that only became known at and after Pentecost when all people received the Holy Spirit, children and the aged, men and women, slaves and free, without regard to nation, social, or ethnic group - all are equal in Christ.

But in Luke 4, they didn't know any of that and much of what Jesus shared with the disciples later about 'the church' was lost on them at the time as a result. These last 2,000 years has been largely for the Gentiles, but there will be a time when (we) are removed and God will once again focus on Israel - the last 7 years of the age. Jesus said "Jerusalem will be trodden down by the Gentiles until the time of the Gentiles is fulfilled*" and Paul said, "Blindness in part has happened to Israel, until the fullness of the Gentiles has come in."* Luke 21:24, Romans 11:25

Back to Jesus nearly being thrown off a cliff; Luke 4:28-30

Jesus stopped mid-sentence perplexing the audience, and even more when He said Isaiah 61:1-2a had been fulfilled that day! After He made other statements:

"And they in the synagogue, all who heard these things, were filled with wrath, and rose up and thrust Him out of the city, to a brow of a hill upon which their city was built, that they might throw Him down from there headlong. But He, passing through the midst of them, went His way."

How did He walk through 'the midst of them' and go His way? That's what I wanted to know.

Jesus going through another crowd: John 8: 58-59

"Jesus said to them, 'Truly, truly, I say to you; Before Abraham was, I AM'. And they picked up stones to throw at Him, but Jesus hid Himself, and went out of the temple through the midst of them, and so passed by."

The phrase 'through the midst of them' uses 'meso' for 'midst', in this sense as an adverb describing the action - He walked right through the middle of the crowd in each case. The word 'hid' is exactly that - hide or conceal. So I wanted to know how He did each of those disappearing acts. Some would suggest He threw a wrap over His face and pushed His way through, but that doesn't make sense since He was 1 man against an angry mob intent on murdering Him. Some have supposed He blinded them temporarily or some other supernatural explanation - I wanted to know, so I asked.

The only time He has referred to contemporary culture to explain Himself

"Remember the Matrix and how they moved in a way it seemed bullets flying at them were in slow motion? It was like that. Remember the episode of Star Trek where the crew of the Enterprise heard a buzzing sound, until some of them entered that dimension and found beings moving much faster than normal time, which was making that buzzing sound to the crew of the Enterprise. They were moving so fast that to them, it seemed the crew was almost standing still."

"Remember, I AM. So all I had to do was speed up near the speed of light, and to me, it seemed like they were moving very slowly, but to them they suddenly couldn't see me and I walked through their midst."

Jesus stated several times He was the I AM. As I shared last week, in Matthew 14:27 when walking on the water towards the frightened men: "Be happy! I AM! Now stop being afraid." Also here in John 8:58, "Before Abraham was; I AM". And in John 18:5-6 when they came looking for Him and He asked who they were looking for. They responded, "Jesus of Nazareth...and He said to them; 'I AM!' And when He said to them, I AM, immediately they moved backwards and fell to the ground."

In the last case He unleashed enough of His power to let all present know He was going voluntarily to His death, not by force. He is the I AM, the One who spoke to Moses from the burning bush, the Ever-present One.

I can't explain this with chapter and verse but I believe...

We've all seen pictures of atoms, or at least recognize a picture of a nucleus with orbiting smaller particles like electrons and neutrons and protons - we've all been to school after all, lol. Somehow molecules - assuming there are spiritual realm molecules (but for lack of a better term) the Lord's realm seem to move at a faster rate than molecules on earth.

When I was given a tour of heaven one of the most amazing things was the ability of my eyes to examine anything I wanted as close as I wanted. I remember the first thing I looked at was a tree about 1/2 mile away (.8km) and just by willing it I could look closer and closer at a leaf until I was looking with unaided eye at the molecular structure - and could even see the atoms moving and hear the hum. I was so startled I immediately started doing that with everything I saw - trees and each tree of a different kind had a slightly different hum than other trees of other species - yet somehow I knew they were all grouped in the same category of hum - not sure how to explain it better than that.

I looked at grass, flowers, rock, the living water - and it all seemed to be moving at a level higher than earthly molecules move - as a higher level of existence and being.

I think that is the action the Lord was referring to when He said He sped up, close to the speed of light - and it makes me wonder about the same process in transporting the boat half way across the lake, and later how Philip was instantly taken 20 miles or so (32km) to meet up with the Ethiopian official. Paul says it so elegantly in I Corinthians 15:39-54 in part: "All flesh is not the same flesh...there are bodies celestial, and bodies terrestrial....it is sown a natural body, it is raised a spiritual body...as we have born the image of the earthly, we shall also bear the image of the heavenly...for corruption must put on incorruption, and mortal must put on immortality..."

I hope this has been a blessing - maybe at a later time I'll share more, but for now a lot of what I've seen and heard remain private - Jesus is amazing! New subject next week, until then, blessings,
John Fenn
